(54) Title: METHOD AND APPARATUS FOR CHECKING THE QUALITY OF SERVICE PROVIDED BY A CELLULAR TELEPHONE SYSTEM

(57) Abstract

A method for checking the quality of service provided by a base station (22) at a location remote from the base station (22), including transmitting signals between the base station (22) and a call transceiver (28) at the remote location, analyzing at least some of the signals at the remote location to formulate at least one parameter indicating the quality of the signals, and transmitting the at least one parameter from a control transceiver (26) at the remote location to the base station (22).
