

DESCRIPTIVE ABSTRACT

Demountable link, suitable in particular for interconnecting two chains for anchoring floating equipment to the ground

5

10 The present invention relates to a demountable link (1), suitable in particular for interconnecting two chains for anchoring floating equipment to the ground. This demountable link (1), shaped like an oblong ring, comprises two straight sections (22) connected by two curved sections (3), and includes: - two side parts (6) each forming one of said curved sections (3), and - two connecting parts (5), each forming at least one portion of one of said straight sections (2), said side parts (6) being assembled with said connecting parts (5), through
15 removable fastening means (7).
