

ABSTRACT**FORMWORK SUPPORT COMPRISING A HOLLOW PROFILE WEB, STIFFENED
BY AN INTERNAL FRAMEWORK, AS A FLANGE CONNECTOR**

5 The invention relates to a formwork support (10) for supporting concrete formworks in the construction sector, comprising an upper flange (12) and a lower flange (14), which are connected to one another via a hollow profile web (16) such that they are at an invariant distance in relation to one another, wherein the hollow profile web (16) is stiffened inside by framework struts (28a, 28b).
