(54) Title: RESTAURANT FOOD PREPARATION LINE

(57) Abstract

A food preparation line having a generally U-shaped configuration. A first section providing a heated storage compartment. A second section providing a cooled storage compartment. The first section arranged to be substantially perpendicular to the second section. A third section attached to the second section and having a pass-through area. The heated storage compartment has two access openings such that the compartment may be restocked and emptied from two different locations respectively.
