ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: METHODS AND SYSTEMS FOR INSTANT VOICE MESSAGING AND INSTANT VOICE MESSAGE RETRIEVAL

(57) Abstract: A system for instant voice messaging comprising an IVM server operative to essentially simultaneously receive from an initiating user at least one voice message fragment and stream the at least one voice fragment to at least one target user; and a switch coupled to the IVM server and operative to effect communications between the initiating user and each target user and the IVM server, as well as between the users themselves. The streaming operation ends with an entire instant voice message being transmitted to the target user(s). Each target user may instantly retrieve a message by using a smart notification provided by the IVM server. Special numbering systems facilitate both the instant voice messaging and the instant message retrieval aspects.
