CKC Online Mobile Innovation Mode for Chinese Learning (Innovation model)

ABSTRACT

The invention discloses a latitude digital online mobile innovation mode Chinese learning resource platform (innovation mode). The platform comprises a client end and a server, an innovative learning platform and innovation mode based on internet, comprising a client end and a server, the client end is in communication connection with the server, the server being used to store teaching resource and user information, the server comprising children park system, online testing system, online learning system, online evaluation system and Chinese online reading international invitation activity system, online mobile innovation mode Chinese learning international symposium system, Chinese online fast reading essay exhibition review after reading Yao Zongyi's work, classic masterpiece silent typing etc. all platform system. "Resource platform" is a form, "innovation mode" is a content, the form reflects the content, the content determines the form. The content is also an inner core of the invention creation project. As a pioneering creation project, being more embodied in concentrated exploration on how to cultivate learners of different ages in humanity in mind, under the power of innovative technology, based on the internet and mobile terminal, to explore "low-consumption and light-load, autonomous and relaxed, efficient and fast, pleasing to the eye" online Chinese recognition, reading, writing etc. of innovation model, to improve talent creative thinking and curiosity, creativity and era literacy. The innovative learning platform and "innovation mode" and scientific and technological innovation are the same in that, it is feasible, sensible, controllable, operable and detectable, after more than ten years of experiments, by 2726 plus 1626 online real-name parents, students and teachers questionnaire, parents and students interviews, a large number of comparison data to prove the process method system can be integrated, can be dedicated; feasible and effective, spreadable, can be promoted, and sustainable.
