(54) Title: RFID SENSOR ARRAY

(57) Abstract: An RFID performance monitoring system may include systems, methods, or computer program products for collecting information related to the performance of an RFID system. One source of performance-related information can be the RFID readers, both during an active (reading) period and an inactive (listening) period. In various embodiments described herein, a performance monitoring system may collect performance-related information from RFID readers during both during their active and inactive periods.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
