ABSTRACT

TREATMENT OF PARKINSON'S DISEASE, OBSTRUCTIVE SLEEP APNEA, DEMENTIA WITH LEWY BODIES, VASCULAR DEMENTIA WITH NON-IMIDAZOLE ALKYLAMINES HISTAMINE H3-RECEPTOR LIGANDS

The present invention provides new method of treatment of Parkinson's disease, obstructive sleep apnea, narcolepsy, dementia with Lewy bodies, vascular dementia with non-imidazole alkylamine derivatives that constitute antagonists of the H_3-receptors of histamine.
