(54) Title: SYSTEMS AND METHODS FOR AN INTRANASAL DRUG DELIVERY SYSTEM

FIG. 1

(57) Abstract: A method of treating a patient with a mental health condition includes administering a dose of a neuron-editing biologic intranasally to the patient. The method also includes administering a brain region activator to activate or deactivate a target brain region. The method further includes transporting the neuron-editing biologic to active neurons within the target brain region using hemodynamics, allowing the neuron-editing biologics to normalize brain activity within the target brain region.
