CLAIMS

1. A pest control material, in the configuration of a mosquito net, having a pyrethroid compound and an insect growth regulator held on a carrier, wherein the compounding ratio of a pyrethroid compound to an insect growth regulator is 1:2 to 2:1.

2. The pest control material according to Claim 1 wherein the carrier is a resin.

~~3. The pest control material according to Claim 1 or 2, in the configuration of a net.~~

~~4. The pest control material according to any one of Claims 1 to 3, in the configuration of a mosquito net.~~

~~5~~3. The pest control material according to ~~any one of~~ Claim~~s~~ 1 ~~to~~ or ~~4~~2, wherein the pyrethroid compound and/or the insect growth regulator is mixed in the carrier.

~~6~~4. The pest control material according to any one of Claims 1 to ~~5~~3, wherein the pyrethroid compound and/or the insect growth regulator is coated on the surface of the carrier.

~~7~~5. The pest control material according to any one of Claims 1 to ~~6~~4, wherein the pyrethroid compound is

permethrin.

~~8~~6. The pest control material according to any one of Claims 1 to ~~7~~5, wherein the insect growth regulator is pyriproxyfen.

~~9~~7. The pest control material according to any one of Claims 1 to ~~7~~5, wherein the insect growth regulator is methoprene.

~~10. The pest control material according to any one of Claims 1 to 9, wherein the compounding ratio of a pyrethroid compound to an insect growth regulator is 1:20 to 20:1.~~

~~11. The pest control material according to any one of Claims 1 to 9, wherein the compounding ratio of a pyrethroid compound to an insect growth regulator is 1:5 to 5:1.~~

~~12. The pest control material according to any one of Claims 1 to 9, wherein the compounding ratio of a pyrethroid compound to an insect growth regulator is 1:2 to 2:1.~~

~~138~~. The pest control material according to any one of Claims 1 to ~~127~~, further comprising a synergist.
