

ABSTRACT

The present application relates to the technical field of computers and provides a method and device for rendering lyrics. The method comprises: obtaining the pronunciation of a polysyllabic word to be rendered in the target lyrics, and obtaining playback time information of the pronunciation in the process of rendering the target lyrics (201); determining a first number of pseudo-names comprised in the pronunciation (202); and performing, according to the first number and the playback time information of the pronunciation of the polysyllabic word to be rendered, word-for-word rendering on the polysyllabic word to be rendered and each pseudo-name in the pronunciation of the polysyllabic word to be rendered simultaneously (203), wherein the pronunciation of the polysyllabic word to be rendered is adjacent to and parallel to the polysyllabic word to be rendered. By means of the method, the lyrics rendering is more reasonable.
