(54) Title: ANAL INCONTINENCE TREATMENT APPARATUS WITH ENERGY TRANSFORMING MEANS

(57) Abstract: An anal incontinence treatment apparatus includes or uses an operable restriction device implanted in a patient and engaging the colon or rectum to form a restricted fecal passageway. An energy transmission means for wireless transmission of energy of a first form from outside the patient's body is provided. An implanted energy transforming means transforms the energy of the first form wirelessly transmitted by the energy transmission means into energy of a second form, which is used to control and operate the restriction device to vary the size of the restricted fecal passageway.
