(54) Title: METHOD AND APPARATUS FOR CONFIGURING VIDEO SPECIAL EFFECT, DEVICE, AND STORAGE MEDIUM

(54) 发明名称: 配置视频特效方法、装置、设备及存储介质

图 1

S110 In response to a first setting operation of a user, add a variable update node in a first special effect event combination, the variable update node being provided with an update method for a target variable
S120 In response to a second setting operation of the user, add a variable trigger node in a second special effect event combination, the variable trigger node being provided with a determination condition for the target variable
S130 Generate a configuration file of a video special effect according to the first special effect event combination and the second special effect event combination, wherein the configuration file is used for instructing the display of the video special effect on a target video; during the displaying process of the video special effect, update the target variable according to the update method in the case that the first special effect event combination is executed until the variable update node is satisfied; and in the case that the target variable satisfies the determination condition, trigger the execution of the second special effect event combination with the variable trigger node as a start point

(57) Abstract: The present disclosure relates to the technical field of special effect processing. Provided are a method and apparatus for configuring a video special effect, a device, and a storage medium. The method comprises: in response to a first setting operation of a user, adding a variable update node in a first special effect event combination, the variable update node being provided with an update method for a target variable; in response to a second setting operation of the user, adding a variable trigger node in a second special effect event combination, the variable trigger node being provided thereon with a determination condition for the target variable; and

generating a configuration file of the video special effect according to the first special effect event combination and the second special effect event combination. The technical solution provided in the present disclosure enables the generation of video special effects to better match the changes in user's movements.

(57) 摘要: 本公开提供一种配置视频特效方法、装置、设备及存储介质, 涉及特效处理技术领域。该方法包括: 响应于用户的第一设置操作, 在第一特效事件组合中添加变量更新节点; 所述变量更新节点上设置有针对目标变量的更新方式; 响应于用户的第二设置操作, 在第二特效事件组合中添加的变量触发节点; 所述变量触发节点上设置有针对所述目标变量的判断条件; 根据所述第一特效事件组合和所述第二特效事件组合, 生成视频特效的配置文件。本公开提供的技术方案, 能够根据使得视频特效的产生更能够贴合用户的动作变化。
