(54) Title: A COMPUTER-IMPLEMENTED METHOD, A COMPUTER SYSTEM AND A CRYPTOCURRENCY DEPOSITORY FOR ENABLING SECURE ESCROW AND SAFEKEEPING OF A CRYPTOCURRENCY

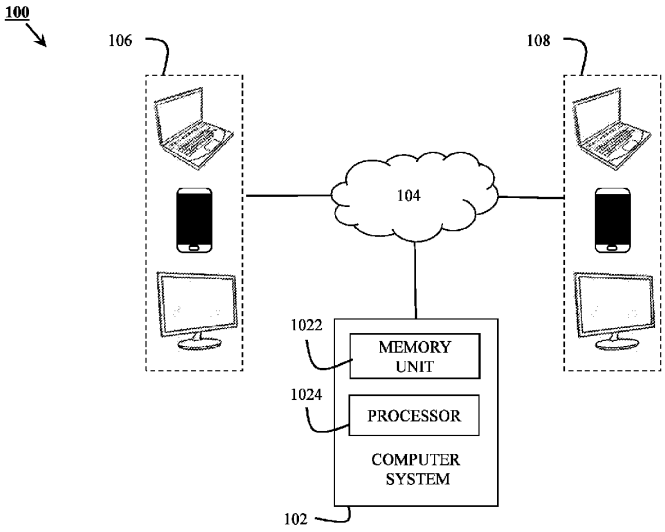

FIG. 1

(57) Abstract: There is provided a computer-implemented method, a computer system and a cryptocurrency depository for enabling secure escrow and safekeeping of a cryptocurrency. The computer implemented method starts by establishing a secure communication between a first party device associated with a depositor of the cryptocurrency and a second party device associated with a secure cryptocurrency depository, in a cryptocurrency network. The secure cryptocurrency depository is a secure cryptocurrency escrow and/or a secure cryptocurrency vault. Further, the first party device and/or the second party device is enabled to transfer the available funds/tokens away from the multi-signature address using the second partially signed provisional transaction template and/or the first partially signed provisional transaction template in possession of the first party device and second party device respectively, in case the first
