

**ANTIFOULING PAINT COMPOSITION AND COATED OBJECT HAVING ANTIFOULING COATING
FORMED USING SAID COMPOSITION ON SURFACE**

ABSTRACT

The antifouling coating composition can maintain stable film dissolution speed for a long period of time in seawater, and can maintain stable antifouling performance without occurrence of film defects such as cracks in the coating film. An antifouling coating composition includes: a resin component (A); and an ester compound (B); wherein the ester compound (B) includes at least one ester compound represented by chemical formulas (1) to (5).
