

TOOL FOR CLEANING LARGE SURFACES

ABSTRACT

The invention relates to a tool (100) for cleaning large surfaces, in particular boat hulls, comprising a tool body (110) and at least one nozzle body (200), the nozzles (202, 202') of which are positioned substantially radially moving outwards from the surface central point of the nozzle body (200). Two rotating nozzle bodies (200) are located on the tool body (110) and in addition, at least one sealing element (120) is spring-mounted on the tool body (110).
