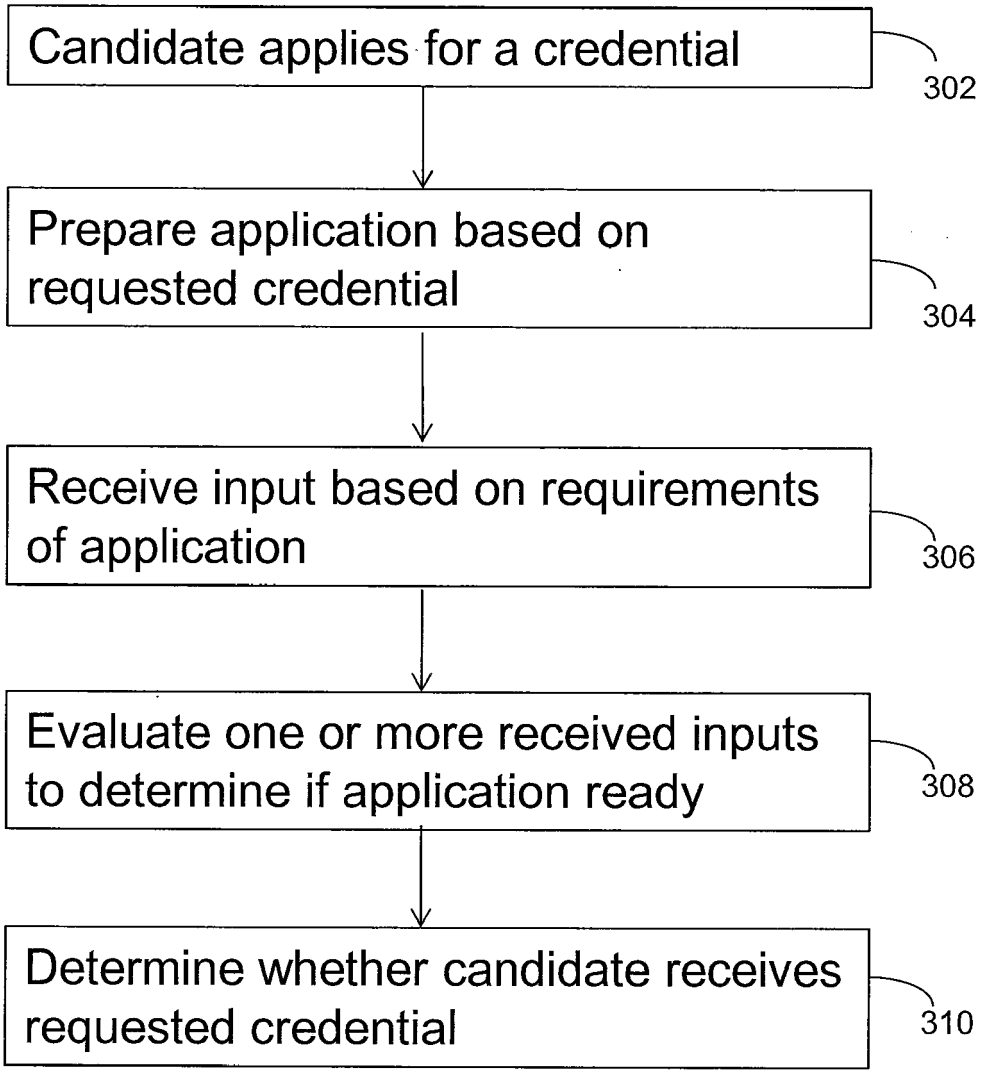
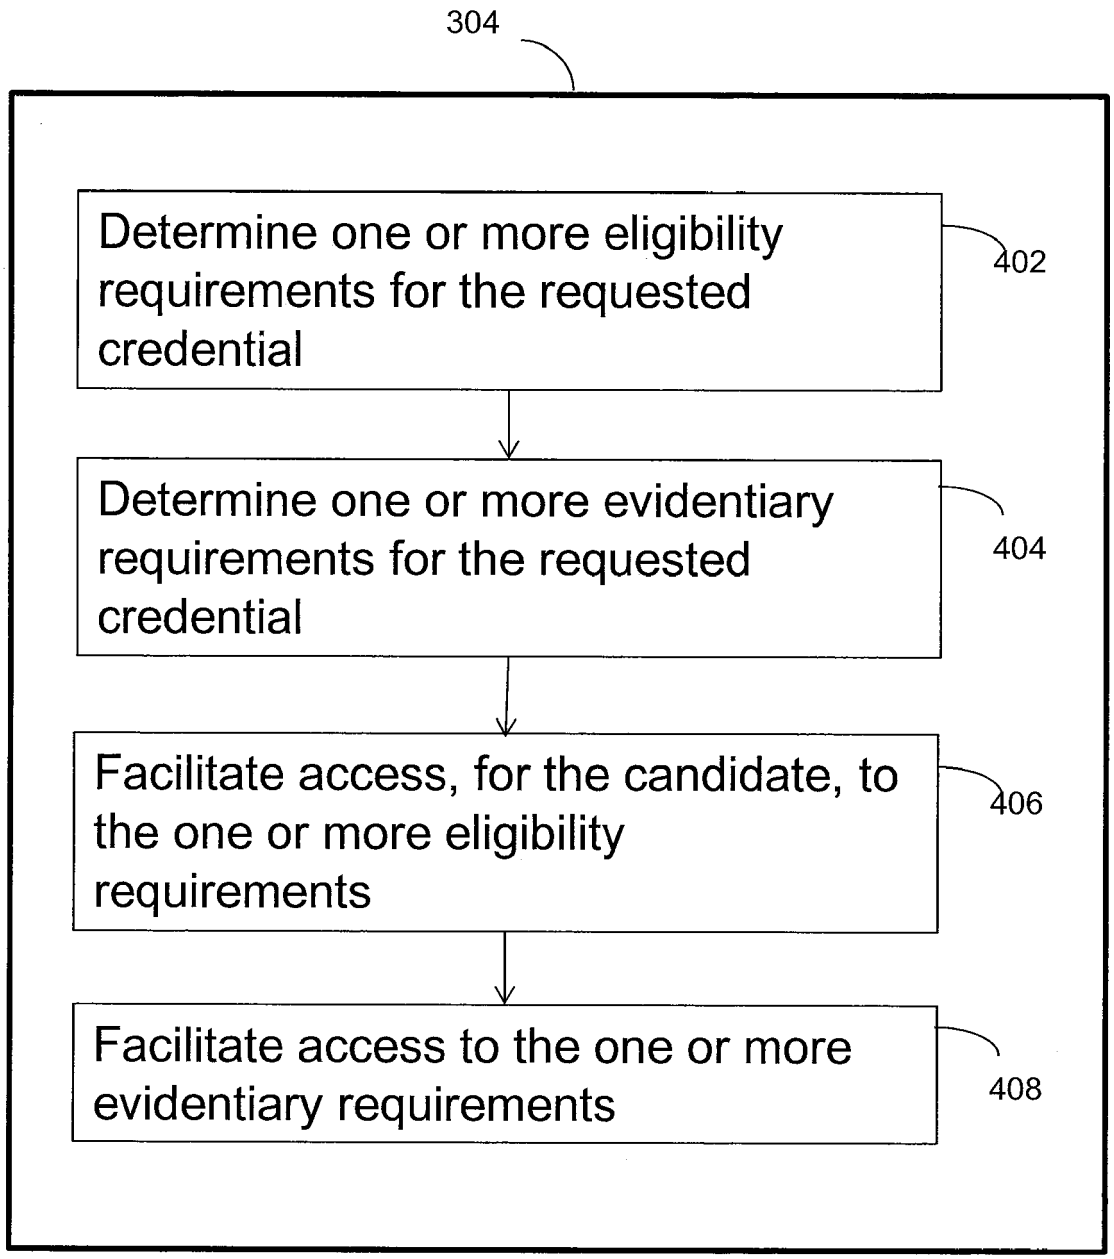
Fig. 3



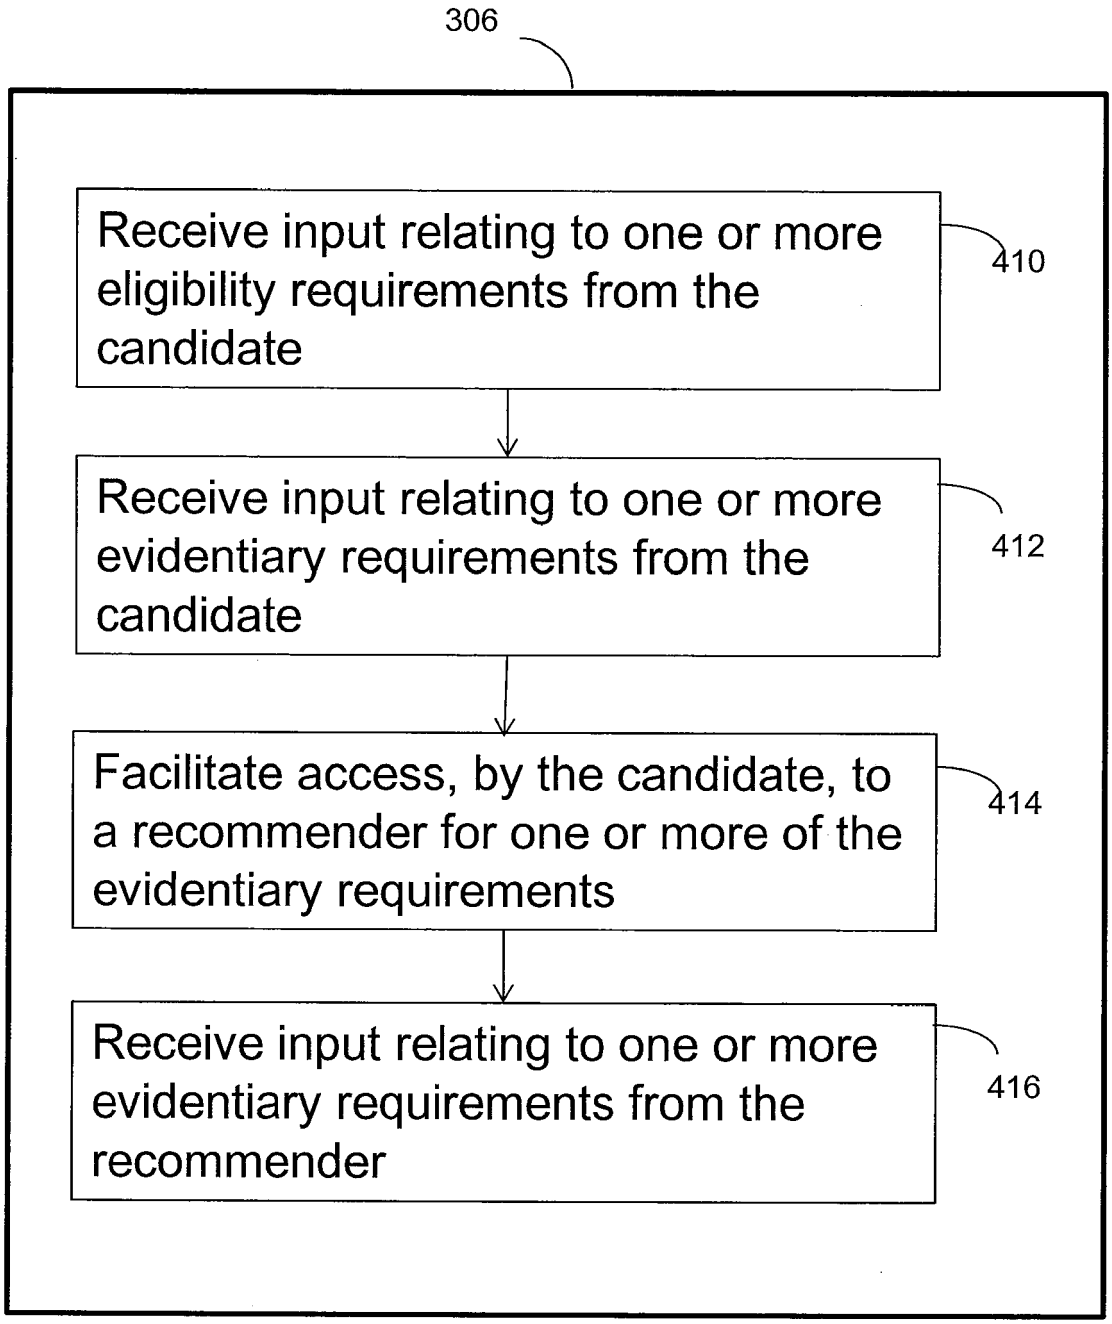
Candidate applies for a credential
302
Prepare application based on requested credential
304
Receive input based on requirements of application
306
Evaluate one or more received inputs to determine if application ready
308
Determine whether candidate receives requested credential
310

Fig. 4A



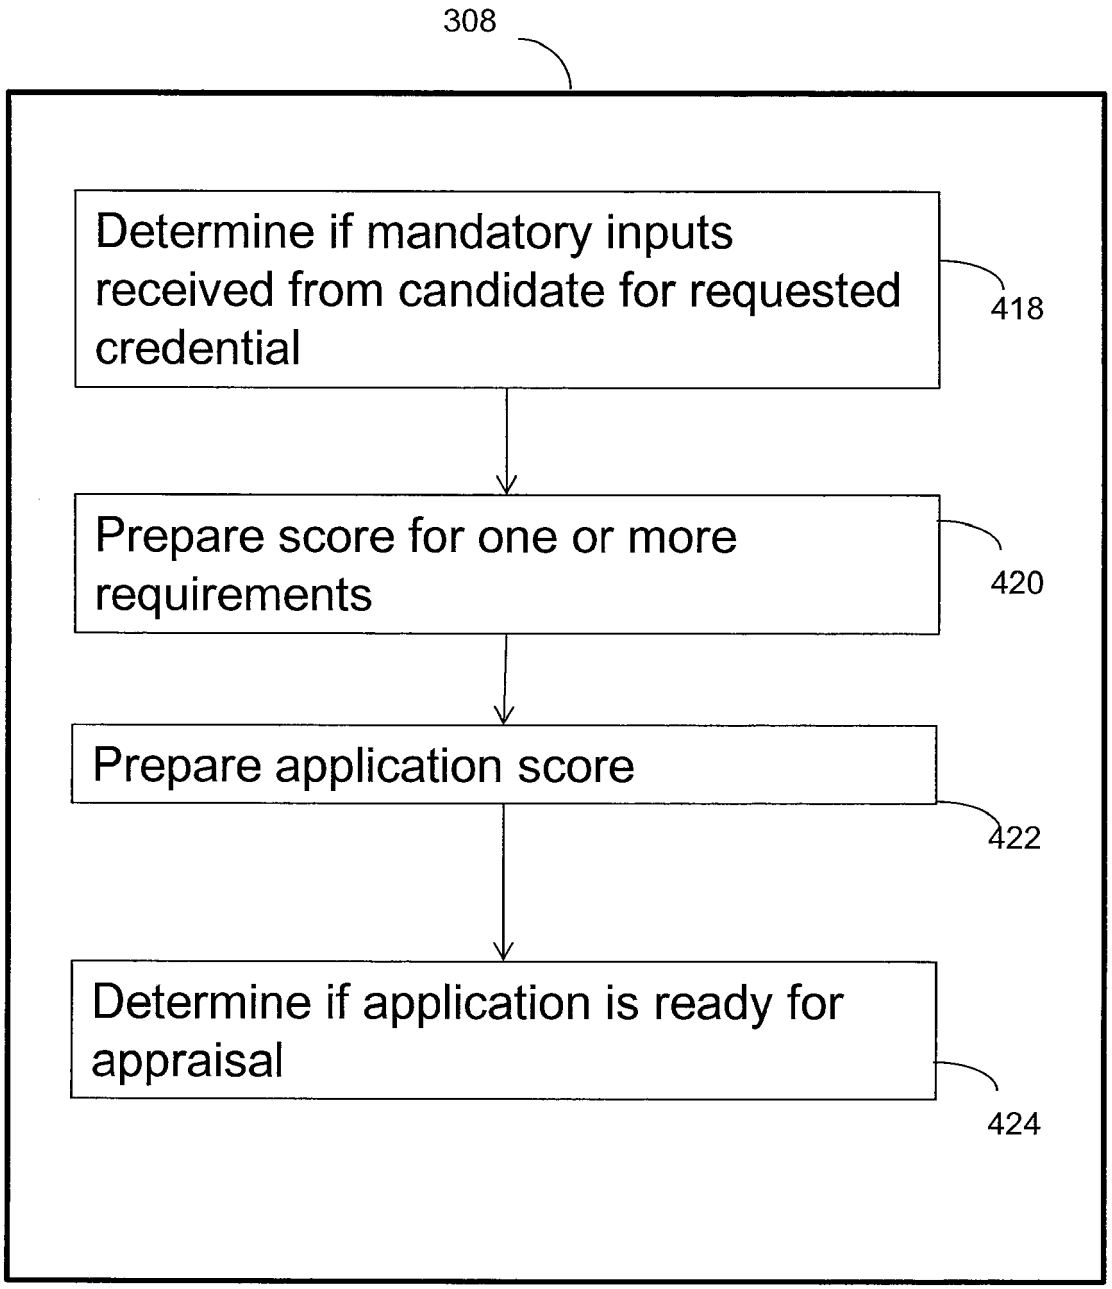
304
Determine one or more eligibility requirements for the requested credential
402
Determine one or more evidentiary requirements for the requested credential
404
Facilitate access, for the candidate, to the one or more eligibility requirements
406
Facilitate access to the one or more evidentiary requirements
408

Fig. 4B



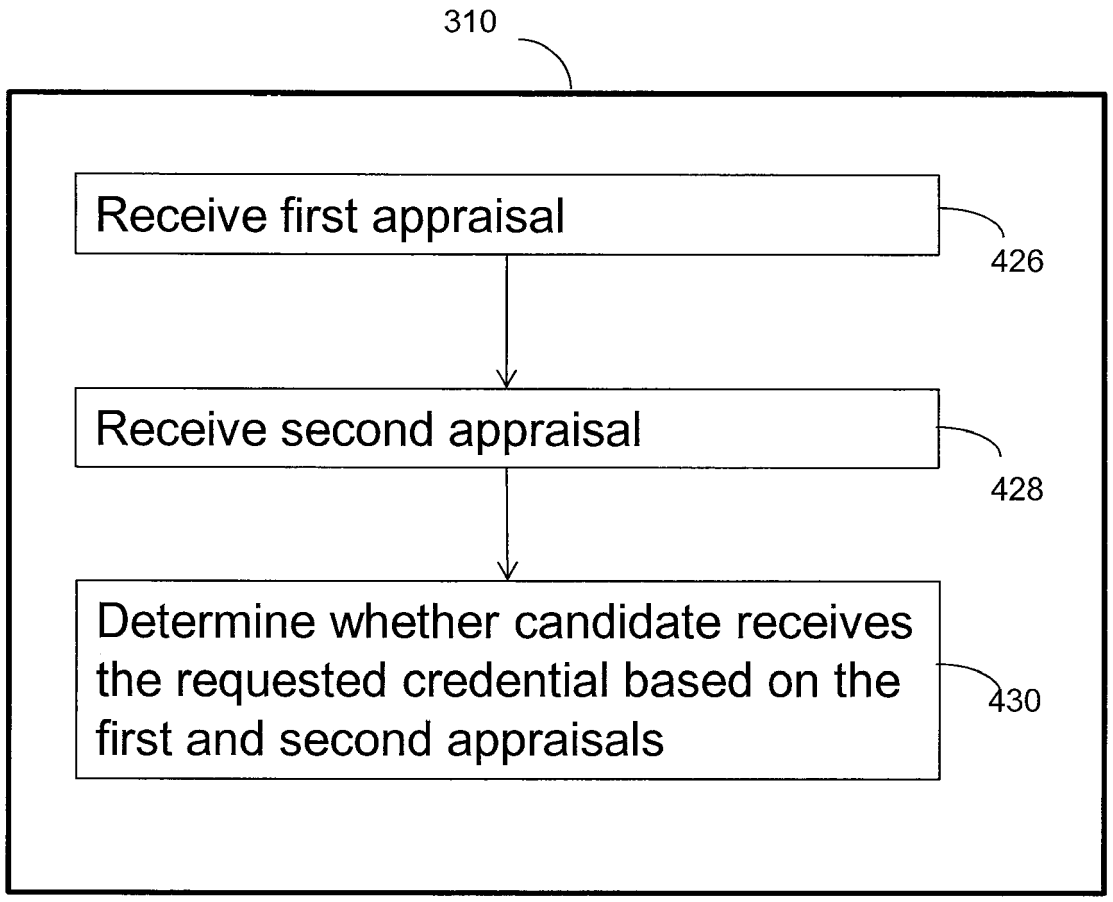
306
Receive input relating to one or more eligibility requirements from the candidate
410
Receive input relating to one or more evidentiary requirements from the candidate
412
Facilitate access, by the candidate, to a recommender for one or more of the evidentiary requirements
414
Receive input relating to one or more evidentiary requirements from the recommender
416

Fig. 4C



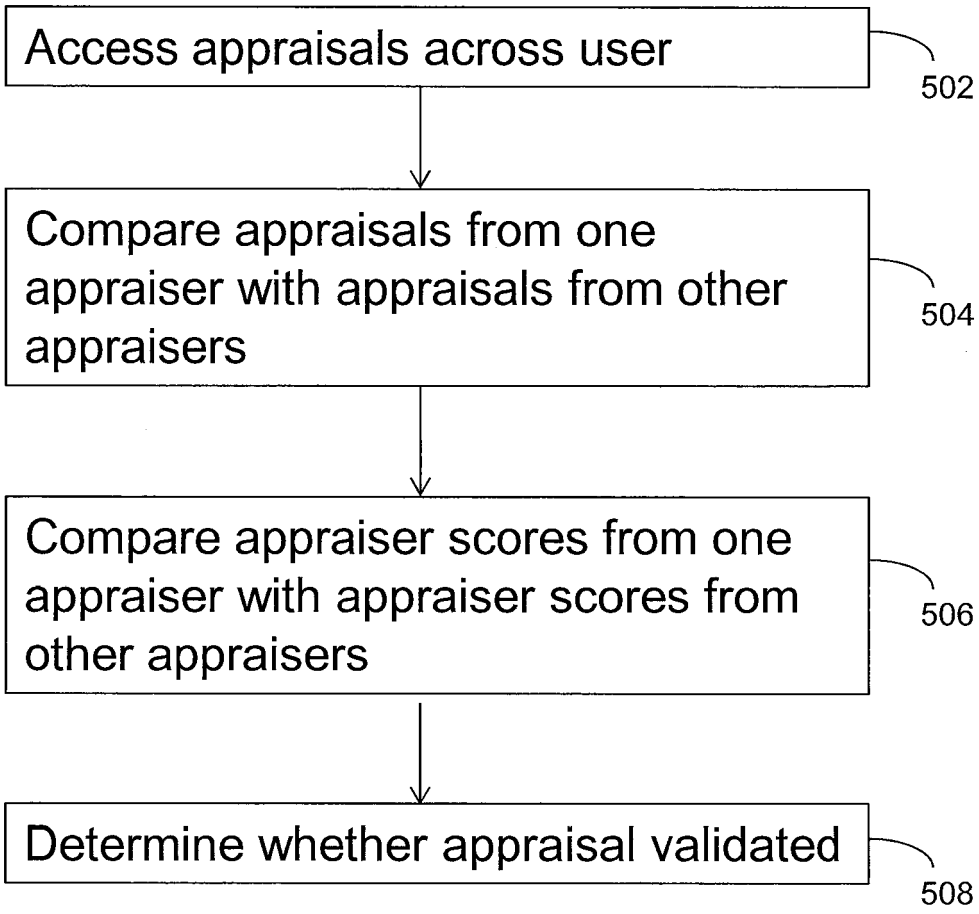
308
Determine if mandatory inputs received from candidate for requested credential
418
Prepare score for one or more requirements
420
Prepare application score
422
Determine if application is ready for appraisal
424

Fig. 4D



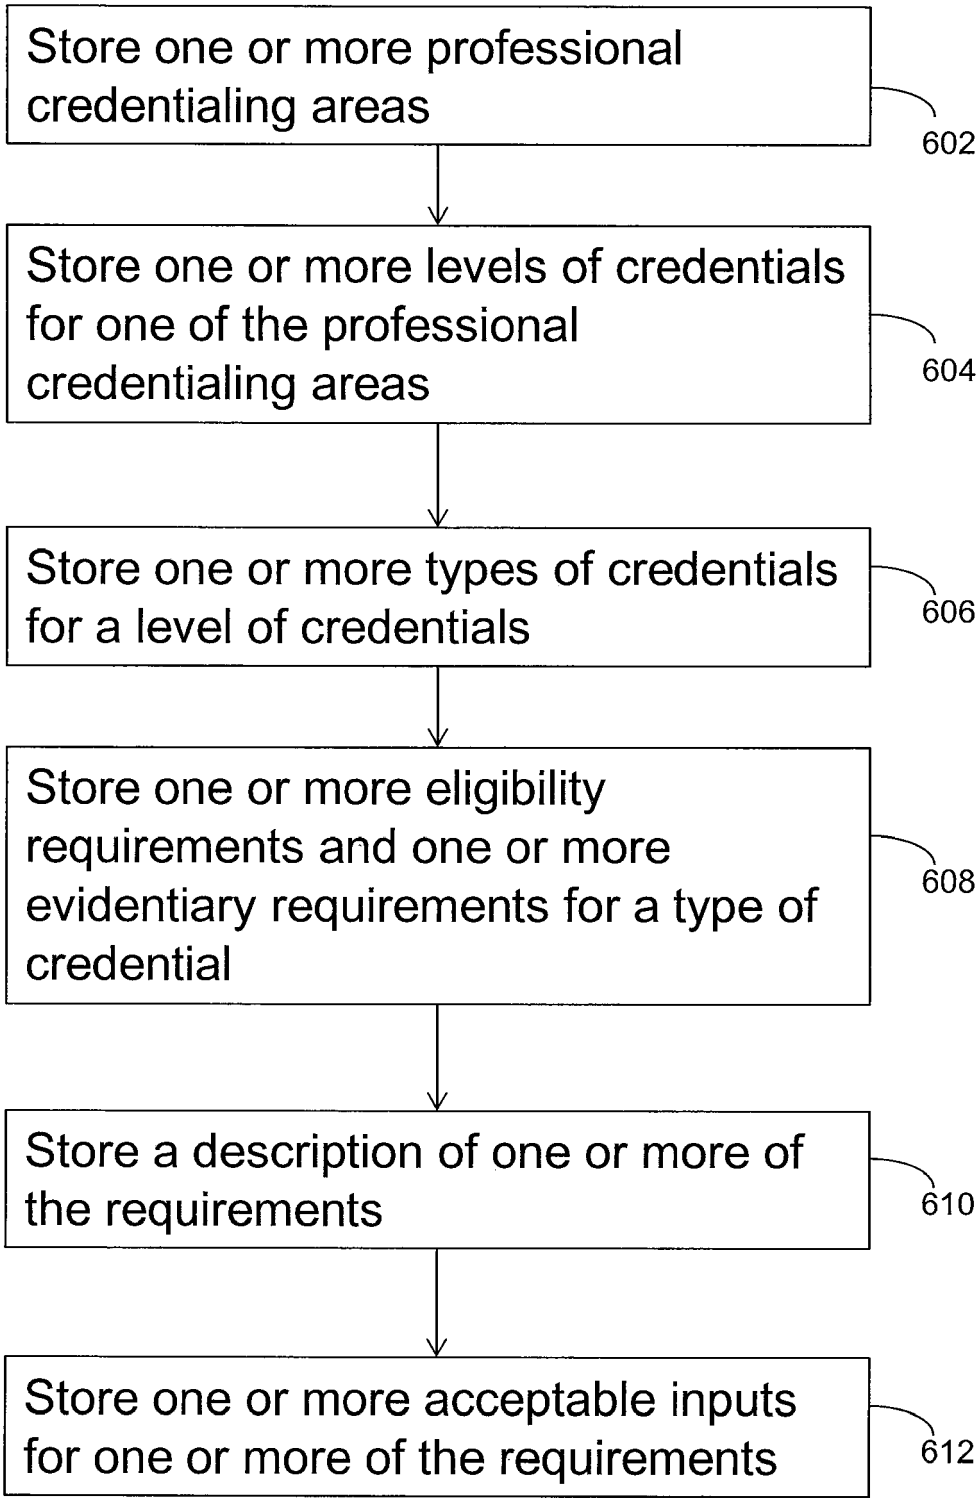
310
Receive first appraisal
426
Receive second appraisal
428
Determine whether candidate receives the requested credential based on the first and second appraisals
430

Fig. 5



Access appraisals across user
502
Compare appraisals from one appraiser with appraisals from other appraisers
504
Compare appraiser scores from one appraiser with appraiser scores from other appraisers
506
Determine whether appraisal validated
508

Fig. 6



Store one or more professional credentialing areas
602
Store one or more levels of credentials for one of the professional credentialing areas
604
Store one or more types of credentials for a level of credentials
606
Store one or more eligibility requirements and one or more evidentiary requirements for a type of credential
608
Store a description of one or more of the requirements
610
Store one or more acceptable inputs for one or more of the requirements
612
