(54) Title: EXPANDABLE SCREEN USING MAGNETIC SHAPE MEMORY ALLOY MATERIAL

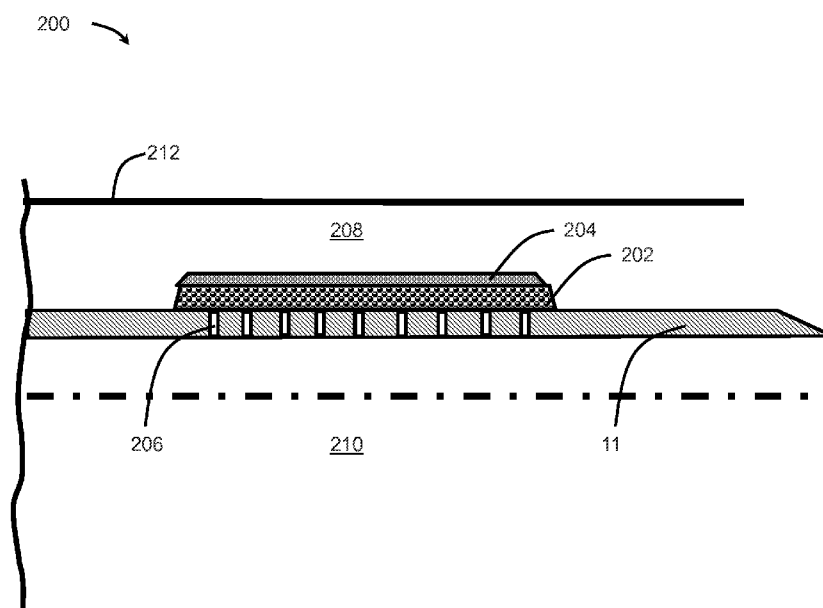

FIG. 2

(57) Abstract: A well screen assembly for use in a wellbore comprises a base pipe comprising one or more fluid passageways, and a shape-memory alloy disposed about the base pipe. The one or more fluid passageways are configured to provide fluid communication between an exterior of the base pipe and a central flowbore, and the shape-memory alloy is configured to transition between an expanded state and a compressed state in response to a trigger.
