(54) **Title:** SUBSTRATE OF PROBE CARD AND METHOD FOR REGENERATING THEREOF

(57) **Abstract:** Provided are a substrate of a probe card for installing a plurality of probes thereon to inspect an object by contacting the probes to the object, and a method for repairing the substrate. The substrate includes main channels electrically connected to the probes; and at least one spare channel for replacing the main channels when at least one of the main channels is damaged. Therefore, when some of the main channels of the probe substrate are damaged, the damaged main channels can be repaired using the spare channels and then the probe substrate can be reused, thereby reducing costs required for unnecessary replacement.
