(54) Title: CATHETER PACKAGE

(57) Abstract

A catheter package (10; 110; 210) comprising a catheter (1; 101; 201) positioned within an inner container (2; 102; 202) permeable to a sterilising agent, for example an ethylene oxide gas. An outer container (3; 103; 203) which prevents access of moisture to the interior thereof encloses the inner container and catheter assembly. Two or more catheters may be stored in individual inner containers within the outer container.
