

ABSTRACT**FOOT CORRECTING AND BALANCING SHOE ASSEMBLY AND METHOD
FOR CORRECTING AND BALANCING USER'S FOOT**

A foot correcting and balancing shoe assembly
5 includes at least one sole unit (11, 12, 13) having an
imaginary transverse line dividing the sole unit (11,
12, 13) into front- and rear-half regions (17, 18). The
rear-half region (18) includes left and right rear-half
sections (182, 181), and a heel area (15) spanning rear
10 portions of the left and right rear-half sections (182,
181). A foot arch correction device (14) is mounted
detachably to the sole unit (11, 12, 13). At least one
balancing pad (22, 23, 24, 25, 26) is mounted detachably
within the sole unit (11, 12, 13) below the foot arch
15 correction device (14), and at a predetermined location
in at least one of the left and right rear-half sections
(182, 181) to maintain foot balance for a user.

Figure 1 is suggested for publication.
