

RAN 4019/135

Abstract

- 5 The invention relates to novel piperidine derivatives of the general formula I

- 10 wherein R¹, R², R³, R⁴, Q, W, X, Z, m and n have the meaning given in the specification. The novel piperidine derivatives can be used as renin inhibitors in the control or prevention of high blood pressure and cardiac insufficiency, as well as glaucoma, cardiac infarct, kidney insufficiency and restonosis.
