

Abstract

The present disclosure relates to a benzo-fused ring compound inhibitor, and a preparation method therefor and the use thereof. Specifically, the present disclosure relates to a compound as represented by general formula (I), a preparation method therefor, a pharmaceutical composition containing the compound, and the use thereof in a drug for the treatment of chronic kidney disease, kidney or cardiac fibrosis, diabetic nephropathy, congestive heart failure, hypertension, primary aldosteronism and Cushing's syndrome, wherein the definition of each substituent in the general formula (I) is the same as defined in the description.
