(54) Title: PRESENCE MONITORING IN A SERVERLESS PEER-TO-PEER SYSTEM

(57) Abstract: Systems and methods are described for facilitiating collaboration and/or communication in a peer-to-peer serverless system. The system may transmit to other computing systems associated with other entities information regarding presence information associated with a user entity. Also, the system may request of other computing systems associated with other entities information regarding presence information associated with the other entities. Presence information may generally indicate the willingness and/or ability of an entity to communicate and/or collaborate with other entities, for example.
