(54) Title: METHOD FOR TREATING INFLAMMATORY DISEASES USING HEAT SHOCK PROTEINS

(57) Abstract

This invention relates to a method to protect a mammal from a disease associated with an inflammatory response and in particular, from an inflammatory disease characterized by eosinophilia, airway hyperresponsiveness and/or a Th2-type immune response. The method includes administration of a heat shock protein to a mammal having such a disease. Formulations useful in the present method are also disclosed.
