(54) Title: AN AQUACULTURE METHOD

Figure 1

(57) Abstract: The invention provides a super-intensive aquaculture method for the growth and harvesting of two or more farmed organisms, involving an aquaculture system comprising one or more farming vessels comprising a first farmed organism, one or more waste reduction vessels comprising a first suspended solids reduction vessel comprising a second farmed organism that consumes at least part of a suspended solid waste generated by the first farmed organism, and a pumping system for transporting water in the one or more waste reduction vessels to the one or more farming vessels, the method further comprising feeding the first farmed organism periodically, and periodically providing a volumetric portion of water from the farmed vessels to the waste reduction vessels, and filled up the volumetric portion of water by the pumping system in the farmed vessels, repeating the steps until the farmed organism is ready for harvest, and harvesting and replacing the farmed organism.
