(54) Title: SYSTEM, TERMINAL, NETWORK ENTITY, METHOD, AND COMPUTER PROGRAM FOR SYSTEM SELECTION IN A MULTI-MODE COMMUNICATION SYSTEM

(57) Abstract: A terminal, network entity, system, method and computer program product enable communications to be established with an available system that is on a priority list and that has a desired service available. Communications may be established automatically with the system that is highest on the priority list and that has the desired service available. Alternatively, all of the systems that are on the priority list and that have the desired service available may be displayed to a user, such that the user may select one of the displayed systems and communications may be established with the selected system.
