

Title of Invention: WASHING MACHINE

ABSTRACT OF THE DISCLOSURE

A washing machine in Embodiment 1 of the present disclosure includes a washing tub, a detergent tank (450), a liquid agent automatic feeding device, and a detergent tank accommodation unit. The washing tub is configured to accommodate the laundry. The detergent tank (450) is configured to store a liquid detergent and includes a detergent tank feeding unit (451) disposed in an upper face of the detergent tank (450) in the installed state. The liquid agent automatic feeding device is configured to feed the liquid detergent stored in the detergent tank (450) into the washing tub. The detergent tank accommodation unit is configured to store the detergent tank (450) and connect the detergent tank (450) to the liquid agent automatic feeding device. The detergent tank (450) is configured to be attachable to and detachable from the liquid agent automatic feeding devices, and hooked to the detergent tank accommodation unit at a position at which the detergent tank feeding unit (451) is opened outward.
