(54) Title: WIRELESS BACKBONE TO CONNECT WIRELESS CELLS

(57) Abstract: A communication system comprising a network interface device; a first coupling device for coupling a first network to a first wireless communication link; a second coupling device for coupling a second network to a second wireless communication link; wherein the first wireless communication link and the second wireless communication link are arranged to form a network backbone communication connection coupled to the network interface device to allow a first communication link to be established between the network interface device and the first coupling device and a second communication link to be established between the network interface device and the second coupling device.
