

ABSTRACT**CLOTHES-DRYING STRUCTURE RACK AND METHOD THEREOF**

5 The invention relates to a clothes-drying structure rack (30) and a method for inserting or
retrieving a clothes-drying pole (20) with wet wash clothes into an existing pipe socket (40),
which cantilevers the pole (20) for outdoor drying. The rack (30) comprises a ledge-rail (31),
an L-shaped supporting arms (32) and an inner rail (33). The arm (32) attaches to a mounting
10 bracket (38) with anchorage bolts (45) and mounted structurally to a socket's (40) wall. The
arms (32) projecting horizontally outward is inclined upward and attached to the ledge-rail
(31). The inner rails (33, 34) welded to the arms (32) are situated in parallel between the wall
and the ledge-rail (31).
