METHODS FOR PREVENTION AND TREATMENT OF PREECLAMPSIA

Abstract

Methods for treating or preventing preeclampsia or eclampsia by administering adherent stromal cells are described. The adherent stromal cells may be derived from bone marrow, placenta, or adipose tissue. Also described is the use of adherent stromal cells for the manufacture of a medicament, and an article of manufacture comprising a packaging material which comprises a label for use in treating or preventing preeclampsia or eclampsia.
