(54) Title: VISUALIZATION TOOLS FOR DIGITAL PCR DATA

(57) Abstract: A method for generating a data visualization is provided. The method includes displaying a representation of a por-
tion of detected data from a substrate to a user. The method further includes generating a data quality value for the portion of detec-
ted data and displaying, along with the representation of the portion of detected data, an indication of data quality value for the por-
tion of detected data. The method further includes selecting, by the user, a quality value threshold, and displaying an adjusted indica-
tion of data quality value for the portion of detected data meeting the quality value threshold.
