USE OF MELOXICAM IN VETERINARY MEDICINE FOR THE TREATMENT OF INFLAMMATORY PAINFUL DISEASES

ABSTRACT

The invention is directed to the use of a formulation containing meloxicam or a pharmacologically acceptable meloxicam salt of an organic or inorganic base and one or more vehicles for preparing a veterinary medical composition having analgesic efficacy for the treatment of inflammatory painful diseases, particularly for the treatment of mild or moderate mastitis cases. The treatment leads to an effective long lasting reduction of a hypersensitive state associated with inflammatory pain in mild or moderate mastitis cases, particularly chronic states thereof.
