

ABSTRACT

One embodiment of the present invention relates to an epoxy resin anticorrosive coating composition, an anticorrosive coating film, a laminated antifouling coating film, an antifouling substrate, or a method of manufacturing an antifouling substrate, and relates to providing an epoxy resin anticorrosive coating composition capable of forming an anticorrosive coating film that has a well-balanced excellence in both anticorrosion property and adhesion with an antifouling coating film having a high rosin content. The epoxy resin anticorrosive coating composition contains an epoxy resin (A), an alkyd resin (B), and an amine curing agent (C).
