(54) Title: SYSTEM AND METHOD FOR PROCESSING ENCODED MESSAGES

(57) Abstract: Systems and methods for processing encoded mes-
sages within a wireless communication system. A server within the
wireless communication system provides one or more indications to
a mobile device as to certain conditions existing with respect to an
encoded message. The mobile device performs a different message
processing function based upon whether the indication is provided.
The indications may include indicating whether a message exceeds
a message size threshold and/or may indicate whether a partial mes-
sage is being sent.
