

ANGIOTENSIN II RECEPTOR ANTAGONIST AND USE THEREOF IN TREATMENT OF PERIPHERALLY-INDUCED NEUROPATHIC PAIN

Abstract

The present invention relates to an angiotensin II receptor antagonist and a use thereof in the treatment of peripherally-induced neuropathic pain. In particular, the present invention provides a compound of Formula (IV) or a pharmaceutically acceptable salt thereof or a stereoisomer thereof, and a use thereof in the treatment of peripherally-induced neuropathic pain.
