

ABSTRACT

CONTACTING STRUCTURE WITH RESPECT TO SPHERICAL BUMP

A contacting structure with respect to a spherical bump in which the spherical bump is to be contacted with a contact pin, the contact pin includes a contacting portion supported by a resilient support element, and the contacting portion is arranged in opposite relation to that part of a spherical surface of the spherical bump excluding a lower dead point portion, wherein the contacting portion has a projection capable of biting the spherical surface of the spherical bump, and also has a pressure receiving surface for setting a biting amount of the projection.
