

ABSTRACT

The present disclosure relates to the technical field of computers, and provides an information display method and apparatus, a device, and a storage medium. The method comprises: acquiring comment text information inputted by a user for a target object; on the basis of the comment text information, determining a first comment type corresponding to the comment text information; and if the first comment type is different from a second comment type, displaying first preset prompt information, wherein the second comment type is a comment type selected by the user for the target object, and the first preset prompt information is used for prompting the user to adjust the comment text information and/or the second comment type. Use of the technical solution can reduce the probability of submitting an erroneous comment due to a misoperation and the like, and improve the accuracy of the comment information.
