

ABSTRACT

DISPOSAL BOX FOR USED PLAYING CARDS

A disposal box (2) for used playing cards (1a) has a cuboid shape provided with six surfaces, namely, front and back surfaces, left and right surfaces, and upper and lower surfaces in an assembled state. The disposal box includes a slit (9) that is provided in at least one of the six surfaces and enables the used playing cards (1a) to be inserted into the disposal box, and further includes viewing windows (10) that are provided with a plurality of holes having a size at which the playing card cannot be taken out, and can allow the used playing cards contained in the disposal box to be visually recognized. The disposal box (2) is formed of a paper or plastic material, and can be discarded in a state in which the used playing cards (1a) are contained in the disposal box.
