(54) Title: TRANSIT-MODE-BASED WEBPAGE ACCESSING METHOD, SYSTEM, AND CRAWLER ROUTE SERVER

FIG. 1

(57) Abstract: A method for accessing webpages based on a transit mode is provided. A crawler route server receives a webpage access request sent from a client where the webpage access request contains identification of a target website to be accessed. The crawler route server obtains a target crawler server which has the fastest speed for accessing the target website corresponding to the identification of the target website to be accessed from at least one crawler server. Further, the method includes the crawler route server returns the identification of the target crawler server to the client, and the client accesses the target website through the target crawler server corresponding to the identification of the target crawler server.
