

A CEILING PANEL**ABSTRACT**

There is provided a ceiling panel for a pod room. The ceiling panel comprises one or more
5 cover components movable between an open configuration and a closed configuration; and an
actuation mechanism configured to move the one or more cover components from the closed
configuration to the open configuration in response to a trigger. The ceiling panel may provide a
specified percentage open area in the open configuration. The ceiling panel may be adapted to
10 acoustically insulate the pod room in the closed configuration.
