

**LUBRICATING OIL COMPOSITIONS CONTAINING A
TETRAALKYL-NAPHTHALENE-1,8 DIAMINE
ANTIOXIDANT**

ABSTRACT

Disclosed is a lubricating oil composition containing an oil of lubricating viscosity and a N,N,N',N'-tetraalkyl-naphthalene-1,8-diamine and at least one additive selected from antioxidants, dispersants, and detergents which together provide superior oxidation inhibition and are suitable lubricants for automotive and truck crankcase lubricants; as well as transmission lubricants, gear lubricants, hydraulic fluids, compressor oils, diesel and marine lubricants.
