(54) Title: MAGNETIC DISK CENTERING SYSTEM AND METHOD

FIG. 1 (Prior Art)

(57) Abstract: A system and method are described for aligning a data axis of one or more circular data-bearing tracks on an annular surface region of a magnetic media-bearing disk, with a spin axis of a spindle of a spindrive or a disk drive. The data axis is perpendicular to the surface region of the disk and the data tracks are concentric with respect to a data axis.
