(54) Title: FLUID FLOW

Fig. 1

(57) Abstract: A method for estimating a volume of liquid output from an electric pump during an operation period of the electric pump, the method comprising: determining a current delay of the pump, wherein the current delay is a period between a first time corresponding to a first current drawn by the pump, and a second time corresponding to a second current drawn by the pump; and generating, based on the current delay, an estimate of the volume of liquid output from the electric pump during the operation period.
