

ABSTRACT

The present invention provides an image processing method and apparatus, a device, and a storage medium. The method comprises: firstly, in response to an image recognition operation triggered for a captured picture on a photographing page, recognizing the captured picture on the photographing page to obtain a recognition result of the captured picture; and then, on the photographing page, displaying a recommendation template for the captured picture, wherein the recommendation template is determined on the basis of the recognition result of the captured picture and is used for processing the captured picture on the photographing page. Hence, according to the image processing method provided in embodiments of the present invention, a photographing template can be recommended to a user on the basis of the recognition result on the captured picture, so that a photographing requirement of the user is better met, and the function of the photographing page is enriched, thereby improving the photographing experience of the user.
