(54) **Title**: REMOTE MONITORING SYSTEMS AND METHODS FOR MEDICAL DEVICES

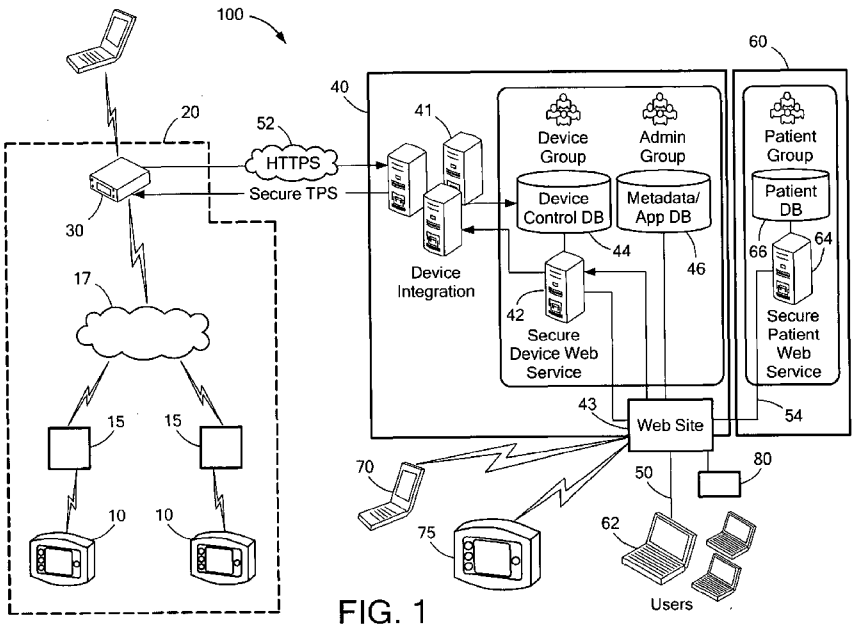

FIG. 1

(57) **Abstract**: A remote monitoring system for monitoring a plurality of medical devices at a patient care or home care facility. The system includes a device integration server in communication with wireless relay modules for receiving data packets from the medical devices including an identifier and data for each medical device. The system also includes an outbound web server. The web server is configured to provide webpages including the data of the medical devices for display on first and second remote monitoring devices, subject to authentication of an associated data request from the monitoring device.
