

Summary

In one aspect, there is provided a compound of formula III, its salts, hydrates, crystalline forms, enantiomers, isomers, metabolites, prodrugs for use as medicaments.

In another aspect, there is provided pharmaceutical composition characterized in that the compound of formula III comprises its salts, hydrates, crystalline forms, enantiomers, isomers, metabolites, prodrugs as described herein in combination with one or more pharmaceutically acceptable excipients.

In another aspect, there is provided use of the compound of formula III as described herein for the manufacture of a medicament for the treatment of diseases of the central and vascular nervous system.

In another aspect, there is provided use of the compound of formula III as described herein for the manufacture of a medicament for the treatment of neurodegenerative diseases.

In another aspect, there is provided use of the compound of formula III for the manufacture of a medicament as described herein for the treatment of Parkinson's disease.

In another aspect, there is provided use of the compound of formula III for the manufacture of a medicament as described herein for the treatment of neuropathic pain.

In another aspect, there is provided use of the compound of formula III for the manufacture of a medicament as described herein for the treatment of different types of dementias.

In another aspect, there is provided use of the compound of formula III for the manufacture of a medicament as described herein for the treatment of Alzheimer's disease.

In another aspect, there is provided use of the compound of formula III for the manufacture of a medicament as described herein for the treatment of vascular dementia.
