

METHOD AND SYSTEM FOR SIGNALING RELEASE CAUSE INDICATION IN A UMTS NETWORK

ABSTRACT

5 A method and system for processing signaling release indication cause
between user equipment and a wireless network, the method comprising the steps of:
monitoring, at the user equipment, whether a signaling connection release indication
should be sent to the wireless network; appending, at the user equipment, a cause for
the signaling connection release indication to the signaling connection release
10 indication; sending the appended signaling connection release indication to the
wireless network; receiving the signaling connection release indication at the wireless
network; and filtering said cause to determine whether to raise an alarm.
