(54) Title: SPEAKER SYSTEMS WITH POLYPLANAR, NESTED, FOLDED HORNS

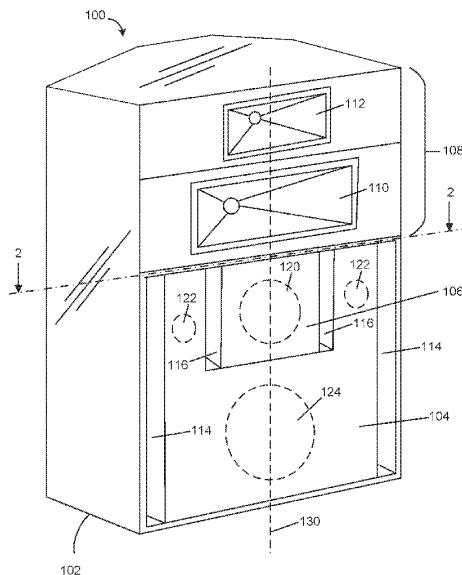

FIG. 1

(57) Abstract: A speaker system including an enclosure, a first acoustic driver engaged with the enclosure, and two or more horns configured to output a sound from the first acoustic driver to a front plane of the enclosure. In one embodiment, the two or more horns may be folded and nested such that the output from the speaker system is tri-planar or poly-planar. In one embodiment, the speaker system may include a second acoustic driver, which may be installed above or below the first acoustic driver. The second acoustic driver may be larger or smaller or the same size when compared to the first acoustic driver.
