ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette

(54) Title: METHOD AND APPARATUS FOR TRANSMITTING AND RECEIVING MULTIMEDIA DATA

(57) Abstract: An apparatus for transmit-
ting/receiving multimedia data including
video data via a wireless packet in a radio
transmitting/receiving system, and a method
thereof are provided. The method comprises
the step of performing uneven error-
protection with respect to one source packet
or a plurality of source packets. According
to the present invention, error resilience of
multimedia data (especially that of video data)
can be increased by unevenly error-protecting
with respect to the source packets without
changing the stack of transmission/reception
protocol in a conventional packet network
such as H. 323.
